ABSTRACT

These two parallel reports provide data on course attrition rates in the Maricopa County Community College District for Fall 1978 and Spring 1979. Course attrition rates were calculated by comparing high-point enrollments (which include audits and withdrawals) with end-of-semester enrollments (which do not include audits, drops, withdrawals, or withdrawals-failing, but do include students with grades A through F, passing, incomplete, no credit, and non-graded). Tables and graphs present these data by college for day and evening enrollments for a selection of departments and courses. After describing and summarizing the data, each report looks at course attrition by department (i.e., all classes, accounting, administration of justice, art, humanities, biology, chemistry, data processing, economics, electronics, English, English humanities, general business, health, history, home economics, mathematics, music, music performance, nursing science, office education, philosophy, physical education, physics, political science, psychology, reading, sociology, Spanish, and speech). Additionally, attrition rates in selected classes are presented, including courses in accounting, data processing, freshman English, business, history, arithmetic, algebra, and psychology. Finally, both reports look at course attrition, for Fall 1973 through Spring 1979, at the district as a whole and at each of its six campuses. (AYC)

REPORT NO: 80-2

TITLE: Course Registration Attrition, Fall 1978-79

PREPARED BY: Marilyn Bresler

DATE PREPARED: June, 1980

SOURCES: Computer reports S90024-21,22,23 were used for data on high point, 45th day, and end of semester enrollments. S60024-7 was used to check course start and stop dates for Rio Salado.

DATA DESCRIPTION AND SELECTION:

Course registration attrition rates were calculated by comparing high point enrollment to end of semester enrollment. Attrition rates were broken down by college for day and evening for a selection of departments and courses.

The computer reports note that high point enrollment data do include audits and withdrawals. End of semester enrollment data do not include audits, drops, withdrawals, and withdrawals failing. End of semester enrollment data do include students with grades A through F, passing, incomplete, no credit, and non-graded.

Enrollment data for Rio Salado are not comparable to those of the other colleges. Accurate day and evening enrollment totals are not available for Rio Salado, so the report shows only the total for day and evening combined.

Rio Salado has variable class start and stop dates. Therefore, enrollment comparisons from high point to end of semester do not necessarily reflect course attrition. In order to provide comparable data for Rio Salado, enrollment data for Rio courses were included if the start and stop dates for the course varied by less than two weeks from that of regular classes. However, on the summary sheet showing enrollment data for ALL CLASSES, enrollment for all classes is included regardless of start and stop dates.

The day total and evening total for the district do not include Rio Salado enrollment data. The day and evening total for the district does include Rio Salado enrollment.

SUMMARY: The overall attrition rate for the district was 24% in the Fall of 1978-79. Evening attrition was higher than day attrition at all colleges. Of the 24% overall attrition, 11% occurred from high point to 45th day and 13% occurred from 45th day to the end of semester.

By department, attrition was lowest in Nursing Science/Basic (12%) and Health (15%) and highest in Accounting (38%), Office Education (35%), Physics (35%), and Spanish (35%).

The graphs show course attrition from 1973 through 1979. Attrition rates seem to be related to overall enrollment - the higher the enrollment the higher the attrition rate. For the past two years, evening attrition rate has been higher than day attrition rate and the difference between the two seems to be increasing.

REPORT NO: 80-2

TITLE: Course Registration Attrition, Fall 1978-79

PREPARED BY: Marilyn Bresler

DATE PREPARED: June, 1980

SOURCES: Computer reports S90024-21,22,23 were used for data on high point, 45th day, and end of semester enrollments. S60024-7 was used to check course start and stop dates for Rio Salado.

DATA DESCRIPTION
AND SELECTION:

Course registration attrition rates were calculated by comparing high point enrollment to end of semester enrollment. Attrition rates were broken down by college for day and evening for a selection of departments and courses.

The computer reports note that high point enrollment data do include audits and withdrawals. End of semester enrollment data do not include audits, drops, withdrawals, and withdrawals failing. End of semester enrollment data do include students with grades A through F, passing, incomplete, no credit, and non-graded.

Enrollment data for Rio Salado are not comparable to those of the other colleges. Accurate day and evening enrollment totals are not available for Rio Salado, so the report shows only the total for day and evening combined.

Rio Salado has variable class start and stop dates. Therefore, enrollment comparisons from high point to end of semester do not necessarily reflect course attrition. In order to provide comparable data for Rio Salado, enrollment data for Rio courses were included if the start and stop dates for the course varied by less than two weeks from that of regular classes. However, on the summary sheet showing enrollment data for ALL CLASSES, enrollment for all classes is included regardless of start and stop dates.

The day total and evening total for the district do not include Rio Salado enrollment data. The day and evening total for the district does include Rio Salado enrollment.

SUMMARY: The overall attrition rate for the district was 24% in the Fall of 1978-79. Evening attrition was higher than day attrition at all colleges. Of the 24% overall attrition, 11% occurred from high point to 45th day and 13% occurred from 45th day to the end of semester.

By department, attrition was lowest in Nursing Science/Basic (12%) and Health (15%) and highest in Accounting (38%), Office Education (35%), Physics (35%), and Spanish (35%).

The graphs show course attrition from 1973 through 1979. Attrition rates seem to be related to overall enrollment - the higher the enrollment the higher the attrition rate. For the past two years, evening attrition rate has been higher than day attrition rate and the difference between the two seems to be increasing.
